Golden Gate Bridge San Francisco, California

The Golden Gate Bridge is a 4,200-foot (1,280-meter) long suspension bridge across the mouth of San Francisco Bay, in central California. In a suspension bridge, vertical ropes hold up the roadway. They connect to tightly woven, thick metal cables attached to tall towers. The Golden Gate Bridge connects San Francisco, in the south, to Marin County, in the north. It quickly became a landmark and is called the most photographed bridge in the world.
