## "Patterns and Stories in the Night Sky"

This is a view of all the stars in the night sky from Reno at 10:00 PM without star names and constellations. Use your imagination to link a group of stars into a new constellation and write a paragraph description of the constellation's story. Submit your constellation and story to tony@tahoestartours.com by July 24, 2020 (PDF and .jpeg formats only). Tony will pick the best constellation and award a Celestron telescope to the winner. Winner will be announced during his library talk on July 31, 2020, at 8:30 PM.
